Wikibase Lua - en:Module:Wikidata

Example in Infobox template [edit source]

Inside an infobox definition, it may be called like this:

- | data55 = {{#invoke:Wikidata|getValue|P26|{{{spouse|FETCH_WIKIDATA}}}} }}

which causes the infobox to:

1. not display spouse if the infobox parameter |spouse is set to be blank (as " | spouse =")
2. display the linked value(s) from Wikidata if the infobox parameter |spouse is not supplied
3. display the local infobox parameter |spouse if it is supplied (e.g. " | spouse = Hillary Clinton")

Optionally, it could be called as:

- | data55 = {{#invoke:Wikidata|getValue|P26|{{{spouse|}}}} }}

which should behave as the parameter does now, unless the parameter is set to FETCH_WIKIDATA when it displays the linked value(s) fetched from Wikidata.

87 I-87 in New York City, NY
90 I-90 in Weston, MA

North end: 95 Route 95 at the Houlton-Woodstock Border Crossing

Location

States: Florida, Georgia, South Carolina, North Carolina, Virginia, District of Columbia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, New

Interstate 95 (I-95) is the main Interstate Highway on the East Coast of the United States.^[2] running largely parallel to the Atlantic Ocean and U.S. Highway 1, serving areas between Florida and New England inclusive. In general, I-95 serves metropolitan areas such as Boston, New York, Philadelphia, Baltimore, and Washington, D.C. in the Northeast and Mid-Atlantic, and Richmond, Fayetteville, Savannah, Jacksonville, and Miami in the Southeast. The route curves inland in the area south of Washington, D.C. and north of Savannah, notably bypassing the coastal metropolitan areas of Norfolk-Virginia Beach and Charleston, which require connections through other Interstate Highways.

I-95 is one of the oldest routes of the Interstate Highway System, yet its completion is still dependent on a project in Pennsylvania and New Jersey that is scheduled to be finished by 2018. Currently, its role that region has been filled in mainly by I-295, by I-195, and by an unsigned portion of the New Jersey Turnpike in Southern New Jersey. Many sections of I-95 incorporated pre-existing sections of toll roads where they served the same right of way.^[3] I-95's two pieces total 1,919.74 mi (3,090 km).^{[4][5]} The southern terminus of I-95 is at U.S. Route 1 (US 1) in Miami, Florida, while the northern terminus is at the Houlton-Woodstock Border Crossing with New Brunswick, Canada.

I-95 is the longest north-south Interstate, followed by I-75, and the sixth-longest Interstate Highway overall after I-70 (2,153 miles, 3,465 km), I-10 (2,460 miles, 3,959 km), I-40 (2,555 miles, 4,112 km), I-80 (2,899 miles, 4,665 km), and I-90 (3,099 miles, 4,987 km).^[1] I-95 passes through more states than any other Interstate Highway at 15 states, followed by I-90, which crosses 13 states. According to the U.S. Census Bureau, only five counties along the route are completely rural,^[6] while statistics provided by the I-95 Corridor Coalition suggest that the region served is "over three times more densely populated than the U.S. average and as densely settled as much of Western Europe".^[7]

FL	382.15	615.01	Main article: Interstate 95 in Florida
GA	112.00	180.25	See also: Florida's Turnpike

Interstate 95 begins at U.S. Route 1 just south of downtown Miami and heads north through the Space Coast, Daytona Beach, Port Orange, Saint Augustine, and then Jacksonville before entering the U.S. state of Georgia near Brunswick. This portion of the highway was notably featured in the film *Flight of the Navigator* under the name Bigfoot Bay.

South Pole Telescope

Coordinates:  90°S 0°E

Pole Station, Antarctica. The telescope's primary goal is to study the cosmic microwave background radiation in the microwave spectrum, with the particular design of the telescope optimized for this purpose. The SPT—designed to find distant, faint galaxies by measuring their polarization—is the first telescope built at the Amundsen–Scott South Pole Station. Construction of the telescope began in 2005 and its construction phase was completed in 2007. The telescope's primary mirror has a diameter of 10 meters. It is used to measure the polarization of incoming microwave radiation to obtain constraints on the mass of the neutrino.

The South Pole Telescope is a joint project between the University of Chicago, the University of California-Berkeley, the University of Colorado-Boulder, McGill University, The University of Michigan, Argonne National Laboratory, and the National Institute of Standards and Technology.

Module:Coordinates

<https://en.wikipedia.org/wiki/Module:Coordinates>

Main entry point for Lua function to replace {{coord}}

Usage:

```
 {{ Invoke:Coordinates | coord }}  
 {{ Invoke:Coordinates | coord | lat | long }}  
 {{ Invoke:Coordinates | coord | lat | lat_flag | long | long_flag }}  
 ...
```

Refer to {{coord}} documentation page for many additional parameters and configuration options.

Note: This function provides the visual display elements of {{coord}}. In order to load coordinates into the database, the {{#coordinates:}} parser function must also be called, this is done automatically in the Lua version of {{coord}}.

```

Template:WikidataCheck

Template:WikidataCheck

From Wikipedia, the free encyclopedia

Template documentation [\[view\]](#) [\[edit\]](#) [\[history\]](#) [\[purge\]](#)

This template allows you to compare a template parameter to a property in Wikidata. It is powered by the Lua module [Module:WikidataCheck](#).

Uses Lua:

- [Module:WikidataCheck](#)

You can call it with: `{{WikidataCheck|property=p###|value={{{{value|}}}}|category=Category prefix|namespaces=0,14}}`

- `|property=` is the p### of the property. The "p" should be lowercase.
- `|value=` is the value to use from the template. This would be something like `{{{id|}}}`
- `|category=` is the prefix to use in front of the category names. The categories created are "[prefix] not in Wikidata", "[prefix] same as Wikidata", and "[prefix] different from Wikidata".
 - It is recommended you create these categories with `{{hiddencat}}` before applying this template.
- `|namespaces=` is a comma separated list of the numerical namespaces to apply the template in. The default is 0, which is just article space.

Example

For `{{MusicBrainz artist}}`, the following is the code to add:

```
 {{WikidataCheck|property=p343|value={{{{mbid|{{{id|{{{1|}}}}}}}}}}|category=MusicBrainz artist id|namespaces=0}}
```

Person Data

Wikipedia:Persondata

From Wikipedia, the free encyclopedia

"WP:PERSON" redirects here. For the guideline about grammatical person, see [WP:TONE](#). For the guideline about the notability of individuals, see [WP:BIO](#).

"WP:DATA" redirects here. For the page on the Wikidata client, see [Wikipedia:Wikidata](#).

Persondata has been deprecated by this RfC closed 26 May 2015.

Persondata was a special set of [metadata](#) that could be added to **biographical** articles only. We are in the process of arranging its removal. From now on, such data should be added to [Wikidata](#) instead.

It consisted of standardized data fields with basic information about the person: name, short description, birth and death dates, and places of birth and death. This structured format, unlike the main body of the article, was designed to facilitate automatic data extraction.

Adding the {{Persondata}} template to a biographical article did not affect its normal display, since the information was not meant to be read by human beings and remained hidden unless users changed their personal stylesheet specifically for it to appear.

A WikiProject worked to improve the usage of Persondata, [WikiProject Persondata](#).

List of paintings by Jacob van Ruisdael

From Wikipedia, the free encyclopedia

The following is an incomplete [list of paintings by Jacob van Ruisdael](#) that are generally accepted as autograph by Seymour Slive and other sources. The list is more or less in order of creation, starting from around 1645 when Jacob began painting on his own. Prior to that, he was assistant to his father [Isaack van Ruisdael](#) and his uncle [Salomon van Ruysdael](#).

This list is generated from data in [Wikidata](#) and is periodically updated by a bot [↗](#).

Edits made within the list area will be removed on the next update!

[Manually update list ↗](#) | [Find images ↗](#)

	Landscape with a Church	1640s	Dulwich Picture Gallery	DPG9
	A Bleaching Ground in a Hollow by a Cottage	1640s	National Gallery	NG44
	View of Enkhuizen	1640s	private collection	

Paintings by Jacob van Ruisdael

(Dutch Wikipedia)

Lijst van schilderijen van Jacob van Ruisdael

Deze lijst geeft een overzicht van schilderijen van **Jacob van Ruisdael**, de 17e-eeuwse Hollandse meester. De meeste zijn landschappen met grote luchtpartijen, maar er staan ook wel architecturstudies op zijn naam. Ruisdael is het meest bekend om zijn watervallen, die volgens de overleveringen de reden zijn dat zijn familienaam is gewijzigd van "Goyer" naar "Ruis-daal".

This list is periodically updated by a bot. Manual changes to the list will be removed on the next update!

Capiunto

Extension:Capiunto/Infobox [edit | edit source]

< Extension:Capiunto

Capiunto provides flexible Infobox functionality for Scribunto.

With Capiunto Lua code to create a basic Infobox might look like this:

```
local capiunto = require 'capiunto'
capiunto.create( {
    title = 'Title of the Infobox'
} )
:c.addRow( 'A label', 'some data' )
:c.addHeader( 'A header between the data rows' )
:c.addRow( 'Another label', 'more data' )
```

Barack Hussein Obama II (US */bə'ra:k hu:'seɪn ə'bɑ:mə/*; born August 4, 1961) is the 44th and current President of the United States, and the first African American to hold the office. Born in Honolulu, Hawaii, Obama is a graduate of Columbia University and Harvard Law School, where he served as president of the *Harvard Law Review*. He was a community organizer in Chicago before earning his law degree. He worked as a civil rights attorney and taught constitutional law at University of Chicago Law School between 1992 and 2004. He served three terms representing the 13th District in the Illinois Senate from 1997 to 2004, running unsuccessfully for the United States House of Representatives in 2000 to Bobby Rush.

In 2004, Obama received national attention during his campaign to represent Illinois in the United States Senate with his victory in the March Democratic Party primary, his keynote address at the Democratic National Convention in July, and his election to the Senate in November. He began his presidential campaign in 2007 and, after a close primary campaign against Hillary Rodham Clinton in 2008, he won sufficient delegates in the Democratic Party primaries to receive the presidential nomination. He then defeated Republican nominee John McCain in the general election, and was inaugurated as president on January 20, 2009. Nine months after his inauguration, Obama was

This page is for gathering input on how to improve the editing of Wikidata's data on a client (like Wikipedia & co.) and make it more accessible. This is relevant to 3rd party sites, special purpose tools and Wikimedia projects although the focus will lie on the latter.

As part of my bachelor thesis I will concern myself with developing a concept to improve the editing of Wikidata's data on a client using a user centered design approach. I'd be happy to get any input and please feel free to add other questions! --Incabell (talk) 12:53, 30 September 2015 (UTC)

Contents [hide]

- 1 Current state and existing solutions
- 2 What are the major problems you see right now with editing on a client?
- 3 Do you have any general or specific ideas on how editing should work?
- 4 Other input

1 Current state and existing solutions [edit]

- on Russian Wikipedia there is a gadget to edit Wikidata: [1] and [2] --Pasleim (talk) 13:38, 30 September 2015 (UTC)
- and on the French Wikipedia fr:User:0x010C/script/DataboxEditor.js (not yet able to edit references, but maybe soon). Oliv0 (talk)
